Accuracy is the code that defines growth prospects of every industry. Throat cut competitions and advanced peculiarities of industrial arena attains cutting edge with accuracy, competence, accomplishment in their operations. At Perfect Enterprise 'perfection' is the convictions that guide us. Since 1995 it has transformed us into an icon of excellence in the horizons of calibration, repairing & reconditioning of Torque Wrenches & Gauges. An experienced & high-skilled team with innovative heavy weights is the only certification that makes some of the esteemed organizations from all over the country relay on us for rewarding solutions.

About Torque Wrenches...

Torque Wrenches are the measures of perfection of varied operations. These are tools used to tighten the bolts with specific torque value in assembly shops, maintenance Department of Engineering industries, Generators & Diesel Engine Repairs, Ship Building Industries etc. These are some of the areas where they play an instrumental role.

Calibration is the key...

Proper Functioning of Torque Wrenches could sometimes result into an inadequate Torque value. Calibration of Torque Wrenches after 2000 repetitions or after every 6 month, depending upon the usage is, the key to the perfection. It increases the efficiency of the old Torque Wrenches with accuracy keeps. The unnecessary expenses of New Torque Wrenches installations away.
